

What is Ecquaria E-Government Platform?

The E-Government Platform is a central system that provides relevant and ready-built platform for quick and mass deployment of online services (e-services). It helps governments to successfully transform current counter services into online services using web and mobile technologies, with the goal of reaping valuable return on investment in the form of social and economic development.

A suite of complete e-government for e-services efficiency

The E-Government Platform

- Puts citizens and government first to give you a purposeful e-government
- Has modules that citizens and government may use right away out-of-the-box to save you from rebuilding
- Provides proven e-service creation tools to match your high standards of excellence

Citizens, Residents, Businesses, Foreigners

Business registration
Licence application

Community outreach
Many, many more...

Citizen Centre

Agency admin, Back-officers, Front-officers, Government representatives

Government Centre

Administrative, processing and tracking features for government users at working and leadership levels

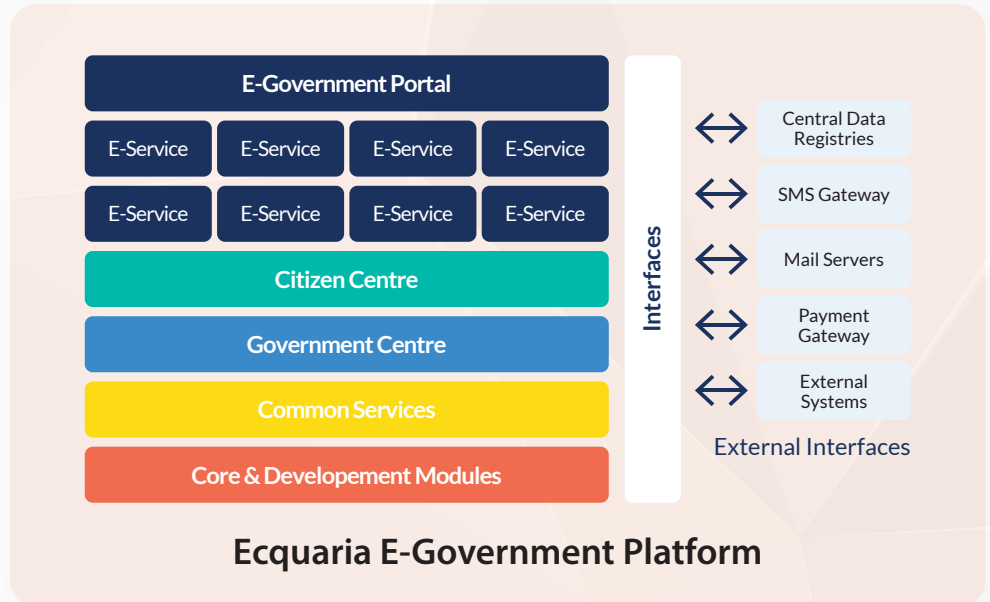

Aimed for E-Government Excellence

Anyone can have an idea for e-government, but the one that works always has proven technology backed by solid vision for both government and citizens. Ecquaria E-Government Platform is driven by four vision elements for e-government excellence.

A Product for Citizens and Government

In addition to software framework that facilitates development work, the Ecquaria E-Government Platform offers a complete package of ready-to-use modules. Together, these modules form a sound foundation for an integrated e-government.

Government Portal & E-Services

Single window to government information and online e-services such as licensing application.

- E-government portal
- Government directory
- E-services directory
- E-services information

Citizen Centre

One-stop online service counter offering convenience and service quality to citizens.

- E-Service Tracker – license submission progress tracking
- Message Hub – messages from the government
- Document Vault – official documents

Government Centre

A suite encapsulating e-government best practices for back-office processing and systems management to deliver service excellence public users.

- Back-Office Administration Tool - submission processing, task assignment, payment details, official document issuance, SLA
- E-Service Registry - e-services management configurable for policy changes
- Performance Monitoring & Reports - government credibility, integrity and accountability

Common Services

Reusable services to save cost and time.

- National Authentication System - common authentication for all e-services
- People Data Services – trusted source of personal data
- Business Data Service – trusted source of business data
- Payment Module – payment documents, history and reports

Core & Development Modules

Administration Modules

- System administration
- User and group management
- Access control
- Audit trails

Rapid E-Services Development Modules

- Powered by Java Enterprise Edition
- Technology agnostic
- Stable, secure and efficient
- Easy-to-use development tools
- Unique form-based e-service development
- Drag-and-drop form designer
- Graphical workflow mapping

E-Government with a Return on Investment

A successful e-government initiative must benefit the society and economy within foreseeable time. It is crucial to garner quick wins with rapid and mass deployment of e-services, and to make these e-services as widely accessible as possible. The E-Government Platform helps governments achieve these goals.

Potential Benefits for All Stakeholders

Benefits to the Government

- Winning trust and confidence from citizens
- Budget savings from lower total cost of system ownership
- Quick and mass production of e-services on extensible e-government platform
- Development of local Information and Technology competencies

Benefits to Individual Government Agencies

- Better management of e-services - license management
- Better enforcement on service delivery efficiency
- Cost savings from reuse of central platform and common e-services

Benefits to Citizens

- More convenience in interaction with government e-services
- Time and cost savings
- Citizen empowerment through more transparency and better information access
